Thrissur, Kerala, India

Summary

Web developer with experience building full-stack web applications using Python and Django. Skilled in developing backend systems, designing databases with PostgreSQL, and creating responsive user interfaces with HTML, JavaScript, and Tailwind CSS. Experience deploying and managing applications on AWS/Linux servers, configuring Nginx, and maintaining production websites.

Skills

Frameworks & Libraries

Django, React

Programming Languages

Python, JavaScript, SQL

Technical Skills

Web development, Full stack, Deployment, Version control

Tools & Software

Docker, Git, Postgresql

Experience

Web Developer

03/2026 - Present
Remote

Upwork

Developed an interactive insurance form using frontend technologies. Captured user input and integrated with Pabbly for external data analysis, streamlining client data collection.

Increased user enrollment by 20% by making the UI simple and responsive

Education

Professional Course in Web Development

10/2023

Kerala State Rutronix

Infratech, Thrissur

Bsc in Physics

01/2023

University of Calicut

SKVC, Thrissur

Certifications

Certificate in Web Development with Python Django

ID: 23106599 - 20

Kerala State Rutronix

Projects

Runwith – Python Library Execution Platform

[View Project](#)

Developed a web interface for executing advanced Python libraries. Built the backend using Python and Django to manage job submission, processing queues, and video rendering inside Docker containers. Implemented PostgreSQL database management and deployed the application on a Linux server using AWS and Nginx. Designed a modular architecture to support multiple rendering libraries and scalable task execution.

Technologies: Python, Django, PostgreSQL, Docker, AWS, Nginx

Doctor Appointment System – Django Web Application

[View Project](#)

Built a Django web application using Python for online doctor appointment booking with authentication for doctors and patients. Implemented many-to-one database relationships to manage appointments and automatically generate token numbers. Developed dashboards allowing doctors to view scheduled patients efficiently.

Technologies: Python, Django

Restaurant Website – React Frontend

[View Project](#)

Designed and developed a responsive restaurant website using React featuring dynamic menu display and an interactive ordering interface. Implemented component-based architecture with reusable UI components to structure the frontend. Configured CI/CD pipeline using GitHub Actions to automate repository mirroring and deployment.

Technologies: React, Javascript, HTML, CSS, GitHub Actions, Git

Static E-commerce Website – JavaScript Cart System

[View Project](#)

Developed a static E-commerce website with product browsing, cart management, and checkout functionality. Implemented client-side cart logic using JavaScript and an email-based order system that sends purchase details to the admin and confirmation emails to customers.

Technologies: HTML, CSS, JavaScript
